
Name two pairs of alternate interior angles. "Z"

$\angle EFB = \angle DBF$ $\angle BFG = \angle ABF$

Name the pairs of corresponding angles. "F"

$\angle HBD = \angle HFG$ $\angle ABF = \angle EFH$ $\angle ABC = \angle EFC$ $\angle CBD = \angle BFG$

List the pairs of cointerior angles. "C"

$\angle DBF + \angle BFG = 180°$

$\angle ABF + \angle BFE = 180°$
